CARRER OBJECTIVE

To leverage my strong foundation in web technologies and programming languages, contribute my skills and creativity to develop innovative and user-friendly websites.

INTERNSHIPS

Oasis Infobyte

Jun 2023 - Jul 2023

- Web Development Internship
- Done projects using HTML, CSS, and JavaScript. Also, gained knowledge and experience on these three main web languages.

Research Intern

Mar 2023 - Jun 2023

- Research Internship at SRM University, AP
- Topic: Extraction of relations using Knowledge graphs.

PROJECTS

Art Gallery Website | HTML, CSS, JavaScript

[Link to Website](#)

- HTML, CSS, JavaScript, Bootstrap
- With the help of this project, users will be able to explore and appreciate a variety of artworks from various artists and genres, experiencing the online visit of an art gallery.

Temperature Converter Website | HTML, CSS, JavaScript

[Link to Website](#)

- The temperature can be converted from (Celsius, Fahrenheit, Kelvin) to (Celsius, Fahrenheit, Kelvin) in any combination.

Advanced Calculator | Python

[Link to Code](#)

- This advanced calculator works on both text statements and expressions. It fetches the word from the command (given by the user) and then formulates the expression. This has arithmetic, modular, exponential, logarithmic, sine, cosine, tangent, and factorial functions.
