PROJECTS

Advanced Calculator

This advance calculator works on the text statement also. The user need not provide algebraic expression always. It fetches the word from the command (given by the user) and then formulates the expression. The advance calculator should have the arithmetic functions, modular, exponential, logarithmic, sine, cosine, tangent, and factorial functions.

Rail Fence Cipher

Given a plain-text message and a numeric key, cipher/de-cipher the given text using Rail Fence algorithm. The rail fence cipher (also called a zigzag cipher) is a form of transposition cipher. It derives its name from the way in which it is encoded.
